

A Medical Intuitive's Approach to Working With Subtle Energies

Welcome!

Laverne E. Denyer

A Medical Intuitive's Approach to Working With Subtle Energies

Laverne E. Denyer

A Question:

Do you know how to locate and identify changes, abnormalities and healthy patterns within a person's subtle energy system?

**That is what we are
about to discuss**

Defining the Living Energy System

- *Each individual is a complex package of subtle and material energies*
- *Which I call the Living Energy System (LES).*

Maps and Descriptions of the LES

- *Like basic anatomical maps of the human body*
 - *(Such as Grey's Anatomy).*
- *Provide a reference tool*
 - *For identifying optimal health patterns*
- *We rarely see individuals who fully conform to those ideal maps*
- *Compare what "is" to what "could be"*

**In this
presentation....**

**Address the diversity of
subtle energy changes
that take place in the
Living Energy System
as a result of injury,
illness, emotions and
revelations**

**Discuss energetic
misalignments, devices,
weaknesses, intrusions,
holes and other
changes that may occur
in the subtle body
system**

**I plan to take you
beyond the normative
structure and share
some of my discoveries
about the ways we
impact our subtle
energy bodies**

First, let me introduce myself

*...to establish the basis
of this information*

Laverne is...

- *Practicing medical intuitive and holistic health professional since 1970*
- *Doing this type of work since I was a small child*

- *I came into the world with an innate sense of energy patterns and the ability to sense when and where they were not functioning at peak performance*

**Worked on, and helped,
people from all over the
world**

Carefully studied the complex patterns of energy in both healthy and unusual bodies

**Experience with people
of all ages, genders,
races, sizes and
degrees of health**

**Also worked with many
animals, places and
things**

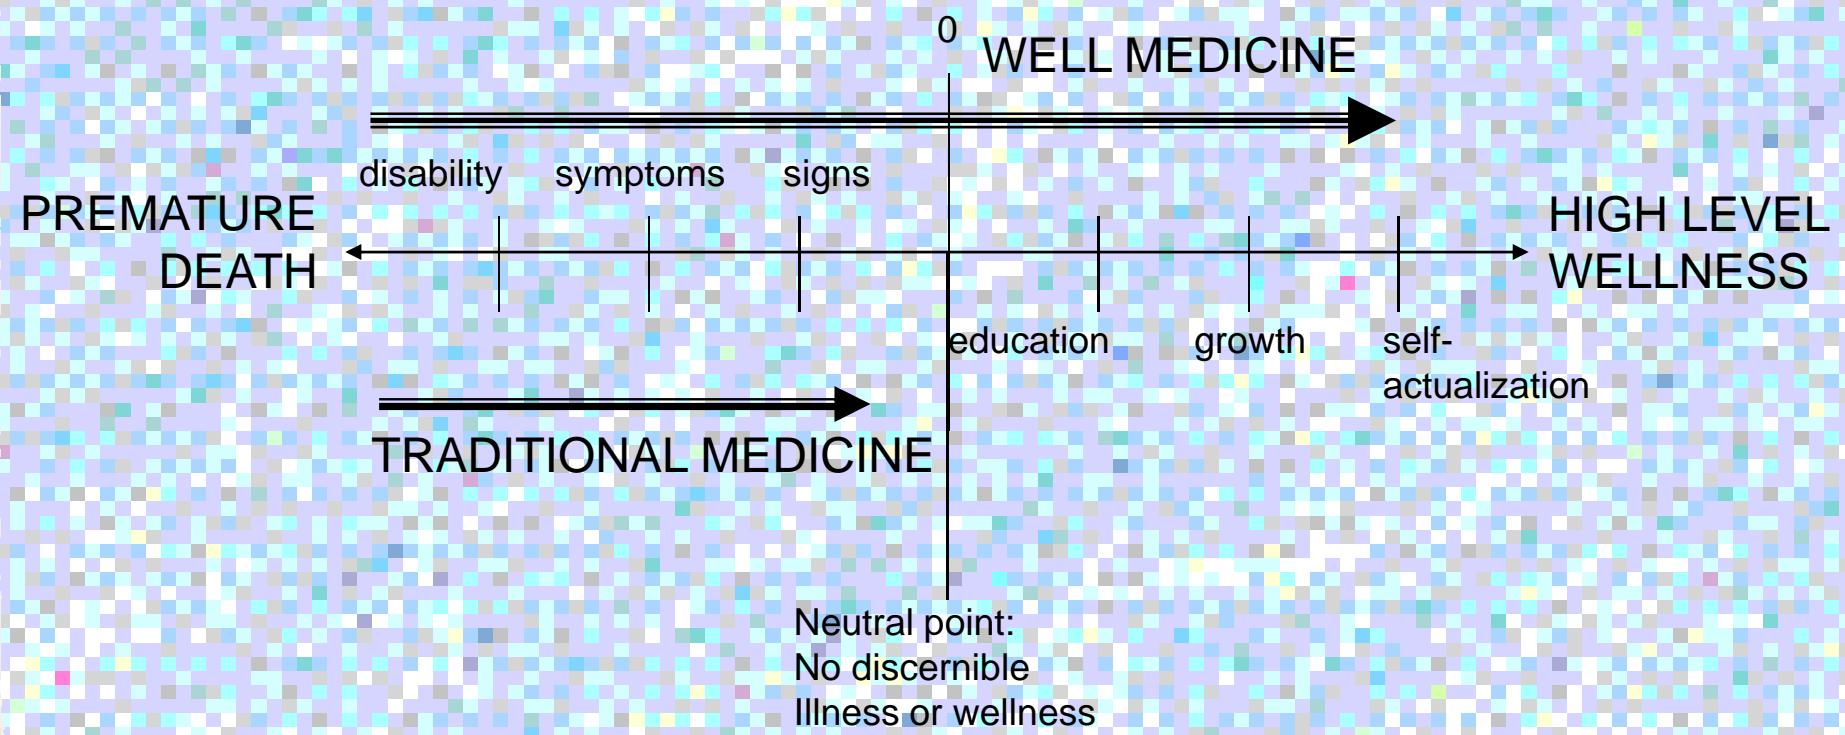

Thus, a book on the
“Living Energy
Systems” as a result of
that work

**So let's begin with what
you came here for...**

What is Meant by Wellness

John Travis, M.D.

How we impact the LES

Each thought creates an energy packet that takes on a corresponding form in the LES

Each packet is initially small and unobtrusive

- *When we have fleeting thoughts/ emotions/ desires/ fears,*
- *the energy packet is unobtrusive and can melt away into insignificance*

When these thoughts are recurring, and/or especially when they are highly charged

- *They group together and build*
- *Into more and more powerful and intrusive patterns*

Intuition plays an indispensable role in self-diagnosis, pain control, immune response and recovery from acute and chronic illness. This is the basis for learning medical intuition. As you nurture your mind's intuitive healing capacity your body then provides the subtle energy needed to create holistic methodologies that assist you in creating breakthroughs in anxiety, panic, depression, and other emotional blockages. This approach can be a bridge between traditional and alternative medicine.

Judith Orloff MD

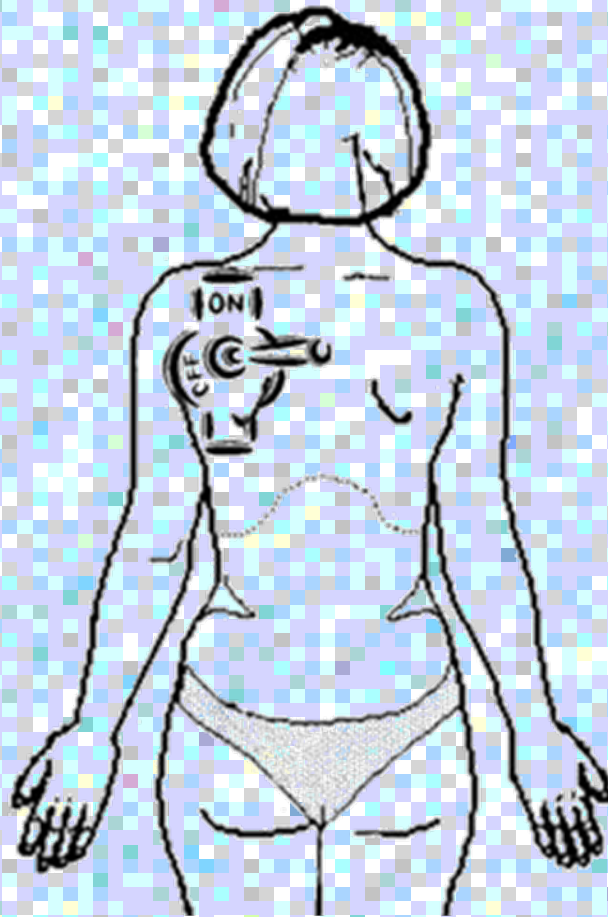

Intuition for Health & Healing

Gate Valves & Other Controls

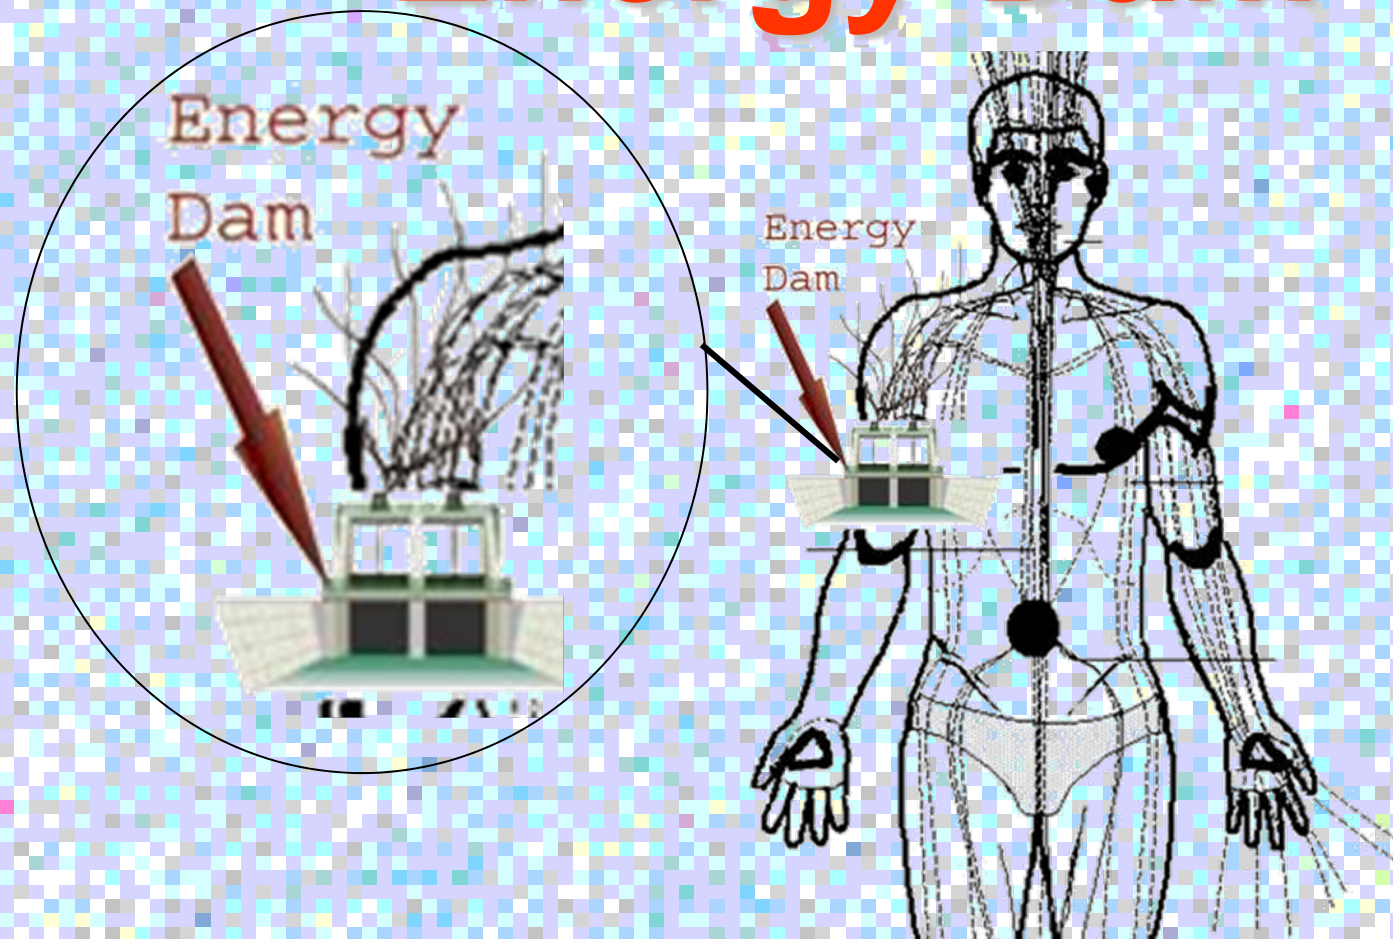

Some of the devices are quite simple: little gate valves in the energy stream can impact the level of energy flow throughout the LES. Look at the illustration to the right for an example.

Switches

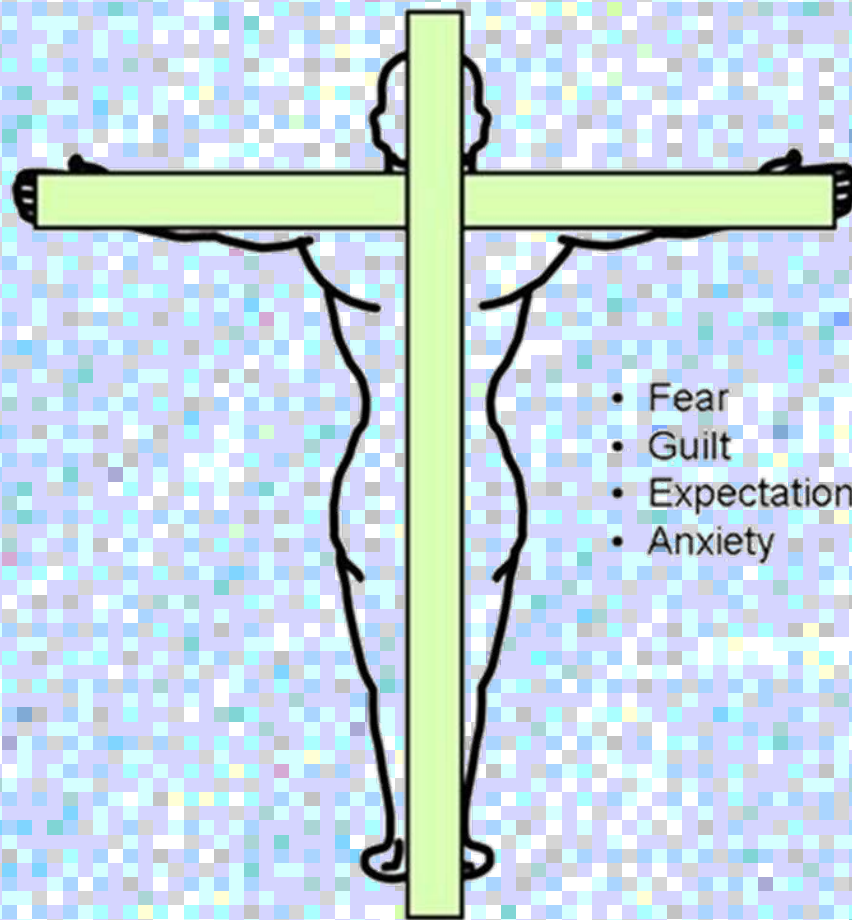

Sometimes complicated bypass devices with elaborate control valves and switches are implanted at power junctions, around organs and chakras. This can control the level of energy passing through any part of the LES.

Energy Dam

I have found a number of other devices that inhibit the flow of energy through the subtle body systems. One such device is an energy dam. Sometimes these dams block the energy entirely (like the illustration to the right), and sometimes they simply slow down the supply.

Cross to Bear

- Fear
- Guilt
- Expectations
- Anxiety

When there is a sense of guilt or excessive burden, it can manifest as a literal “Cross to Bear.” When this happens, an energy pattern of a large cross will develop across the person’s upper back, shoulder and arms.

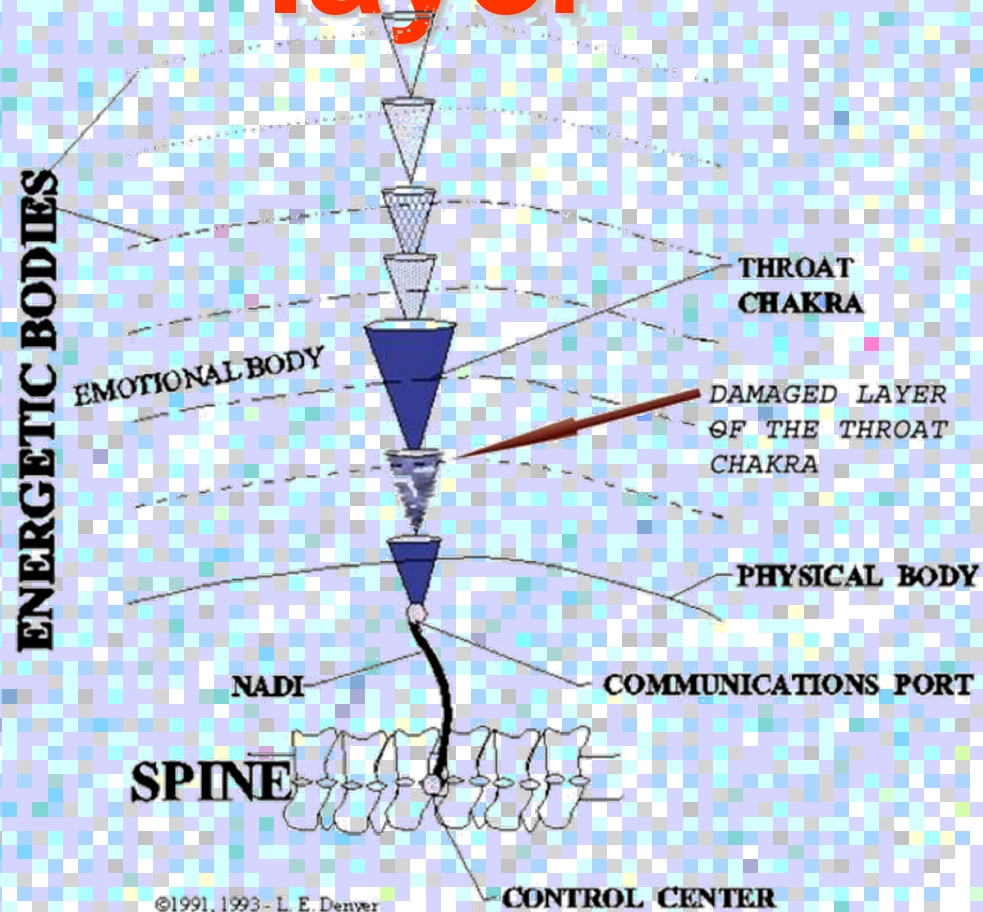

Deformed Chakra Funnel

HEALTHY CHAKRA DAMAGED CHAKRA

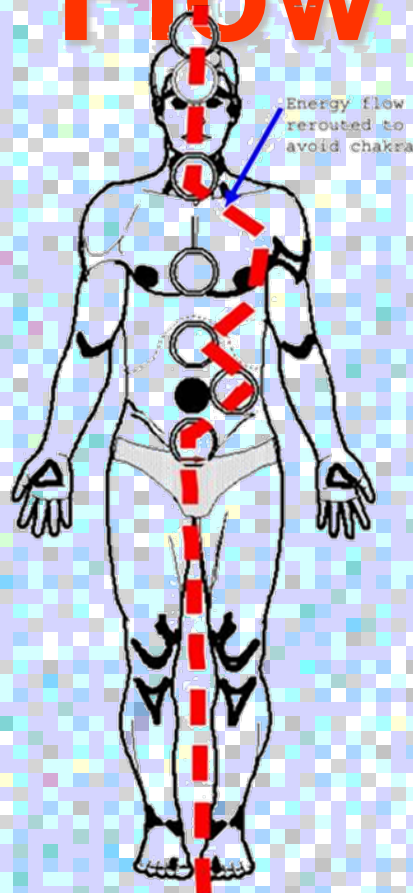

The chakras, energy centers and conduits, can be deformed.

Damaged subsidiary layer

Other types of damage to chakras can occur when one of the duplicate, subsidiary chakras in a minor energetic body level is damaged and not functioning well.

Redirection of Energy Flow

©1981, 1988, 1991, 1993, 1996, 2007, E.T. Incorp.

Another way that the energy system can be affected is when a chakra is bypassed by the energy flow through the system.

Energy Shields & Barriers

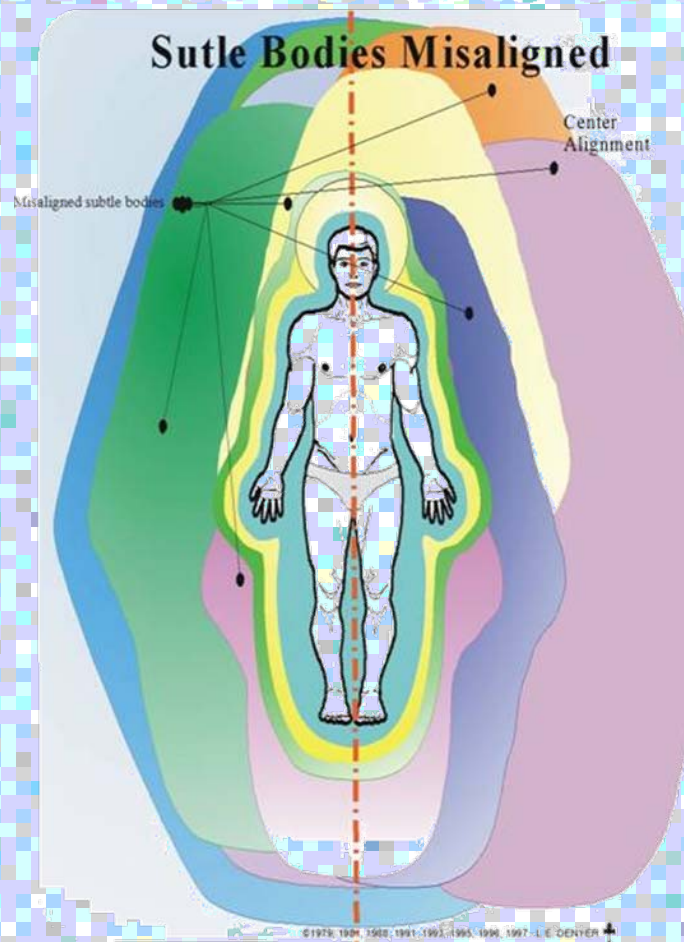

Sometimes complex shields are put in place to protect or inhibit natural functions. These shields often are the result of an initial sense of being attacked.

Healthy Subtle Bodies

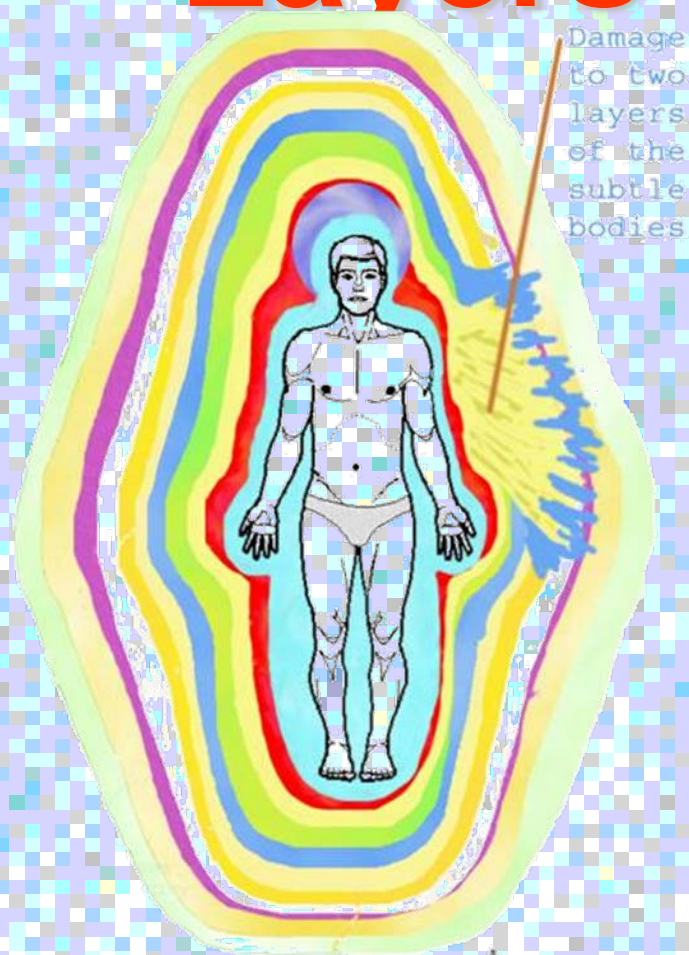

Misaligned Subtle Bodies

This can occur, and one of the most common is a misalignment of the bodies. They do not align to a central axis, and are not proportionally placed around the physical body. The layers do not relate in order of precedence and do not allow for a healthy flow of energy between them.

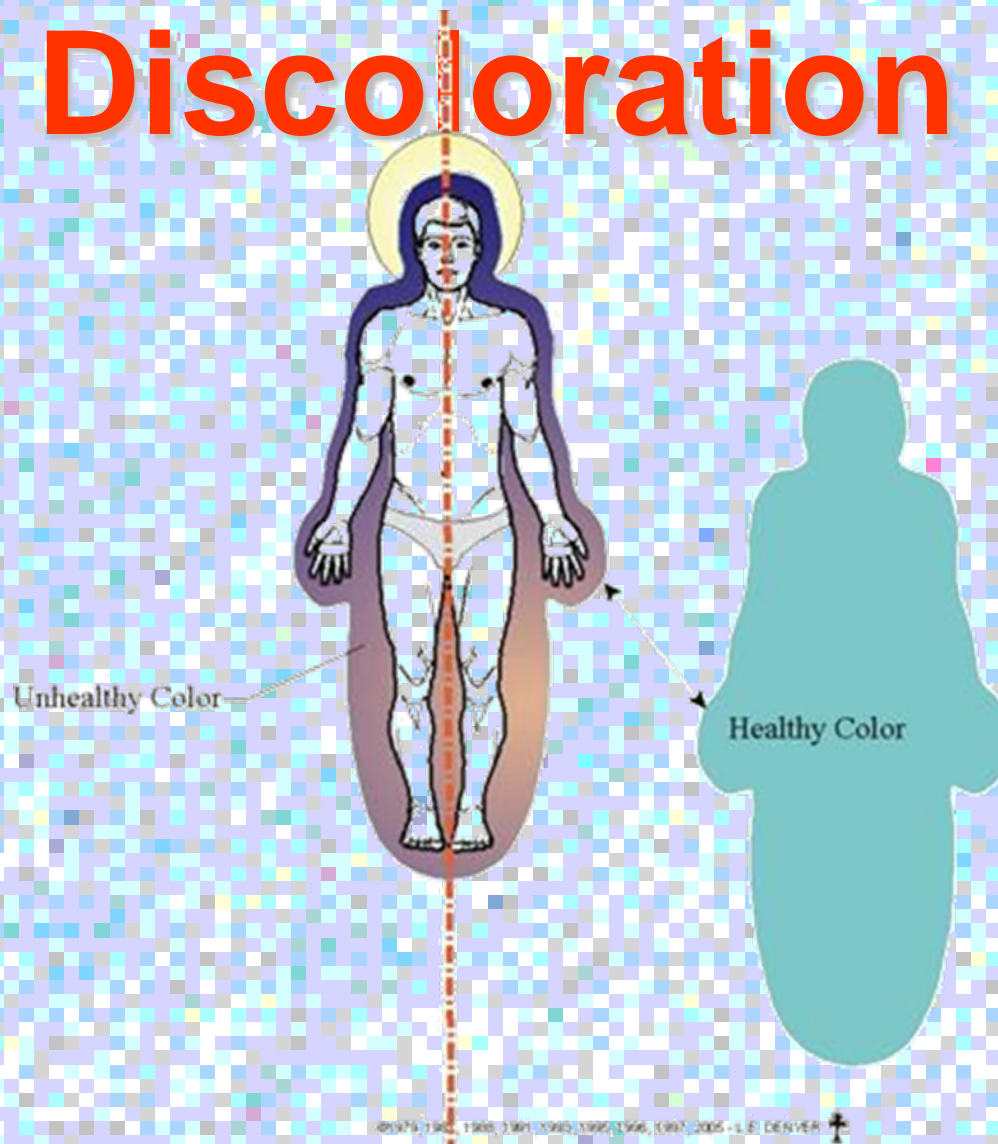

Tears in Subtle Body Layers

©1979-1984, 1988, 1991, 1993, 1995, 1996, 1997, 2002 - L.E. DENYER

A fairly common disorder is when there are tears or eruptions in one or more layers of the energetic bodies.

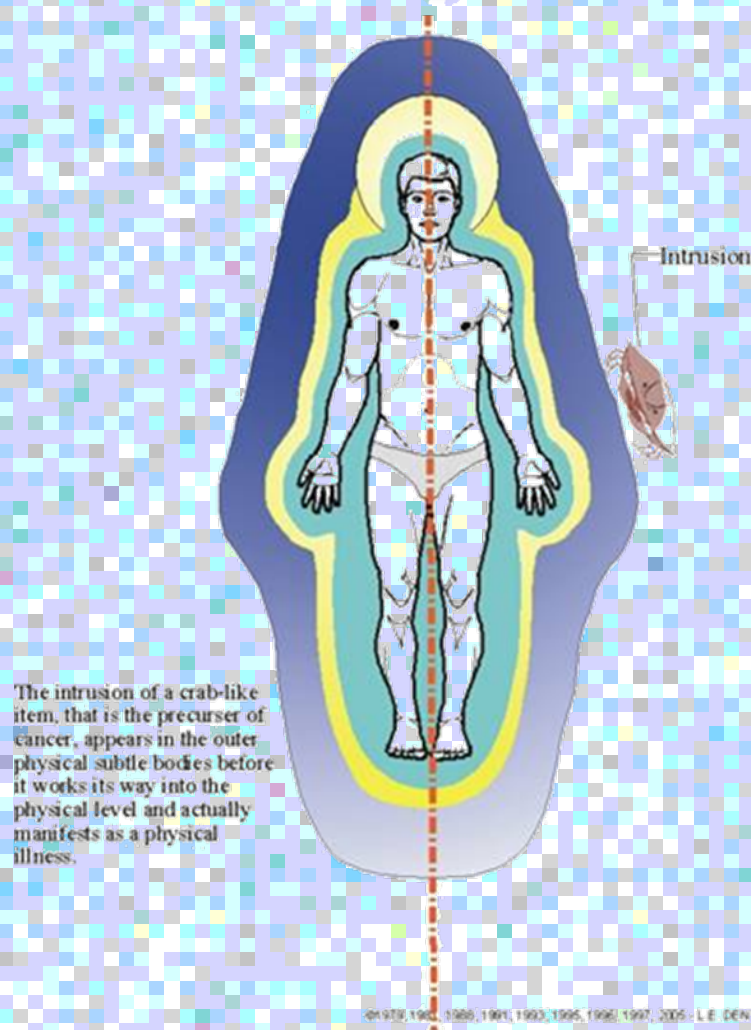

Subtle Body Discoloration

©1979, 1982, 1988, 1989, 1990, 1992/1996, 1997, 2005 - L.E. DENVER ✚

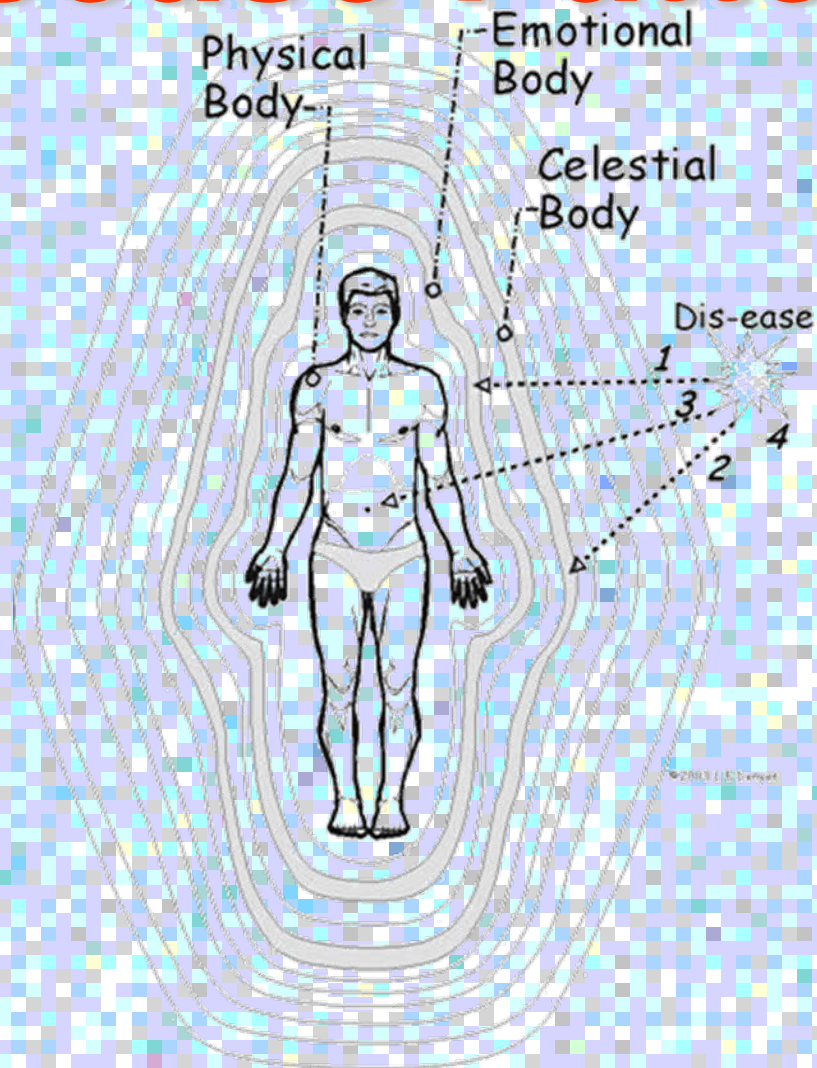

Another example is when all or part of a layer is polluted and changes color.

Subtle Body Intrusions

A very common type of damage is intrusion or devices set into one or more layers.

Disease Pattern

An example of how an initial disease or “dis-ease” pattern spreads from layer to layer.

Energy Drain

Drains are sometimes implanted to either drain away excess energy, or to deplete systems in order to retard healthy functioning and/or progress.

An Adept's LES

Profound spiritual experiences can greatly improve aspects of the LES.

A Sample Case Study

- *One that was alluded to in the 2004 presentation*

Case Study

- *Client Name:*
 - *“Suzie” (changed to protect the individual’s privacy)*
- *Gender:*
 - *Female*
- *Age:*
 - *23*
- *Physical Description:*
 - *Slender, fair skinned - almost pallid, blond hair, unhealthy complexion, frail appearance, walking with a cane*

Complaints:

- *Severe lung impairment*
- *Chest pain*
- *Back pain*
- *Unable to walk without a cane*

Duration:

- *Three (3) years*

Reported Onset:

- *Sudden onset*
- *During a solo automobile trip to Oregon from California*
 - *Near the California/Oregon border*
- *Client's symptoms suddenly appeared while driving on the road in the country*

Initial Medical Treatment:

- *Upon returning to her home town following the trip*
- *The client went to her physician*
 - *A general practitioner*
- *Described her symptoms*
- *Physician treated symptoms*
 - *With no apparent relief*

Continuing Medical Treatment:

- *After about six months*
 - *The physician referred the client to a pulmonologist*
- *Eventually the client was referred to a psychologist*
- *The only diagnosis was*
 - *A psychosomatic disorder of unknown cause*

My Contact & Intuitive Discovery:

- *Referred by her psychologist*
 - *I had previous shared clients with the psychologist*
- *We made an appointment for her to come to my office*

Shocking Appearance

- *She was stooped over like a very old woman with an acute case of osteoporosis*
- *Her head hung down*
 - *She was unable to put it upright*
 - *Having to look up out of the top of her eyes*
 - *Creating a limited range of vision.*
- *Her skin was pallid and dry*
 - *Looking thin and brittle.*

- *Each breath was a struggle and resulted in a series of short, painful panting*
- *Her voice was a mere whisper*
 - *It seemed like a great effort to say anything*
- *She had to use a cane to walk*
 - *That mobility was a great strain on her*

**This woman was only 23,
yet she looked like a frail
and ailing 95 year old!!**

Susie explained her situation

- *The phases of deterioration and all of the medical treatment she had tried*
- *A very desperate woman on the verge of a major breakdown*
- *This onset and total disability had been a complete surprise*
- *Told me the story of her trip*

I was frankly shocked at what I found.

- *That time marker she related about the car wreck was very significant.*
 - *In fact, it was the causation.*

According to the “read” I took on her

- *The accident had occurred a short time before Suzie drove by*
- *When she drove by, she was in an altered state from chanting and meditating (very inviting)*
- *She had never learned how to protect herself and so was wide open to external energies*

The car wreck had killed all of the individuals in the car

- *A man, a woman, their daughter, and their dog*
- *When Susie drove by, they were in agony, terrified and completely lost*
- *They had already created a group coffin, because they knew they were dead*
- *But they didn't know where to go or what to do next*

Susie was like a beacon

- *The energetic lights Susie was emanating looked like a safe haven to them*
- *So they went toward that energy, hopping onto Susie's back, coffin, dog and all*

They literally invaded her energy field and took up residence

- *Susie was literally carrying the burden for that family on her back*

**It was incredible that she
had handled the situation
as well as she did**

Procedure:

- *Once I determined the causation, I explained what I saw to Susie*
- *She was shocked yet not unduly surprised*
- *Something in her subconscious seemed to recognize the truth of my descriptions and she accepted it quite readily*

- *I explained that these were lost souls*
 - *That had no idea how to move on toward peace*
 - *Were clinging to her for her life force*
- *They were draining her energies and breaking down her health*

**I began a process of
separation...**

Results:

- *The results were astounding, even to me*
- *Significant changes from the beginning*
- *When Susie left she was walking freely and upright*
 - *She demonstrated none of the previous symptoms*
 - *She was happy, really happy, for the first time in over three years!!*

Follow-Up:

- *I kept in touch with Susie and her psychologist for about two years following that one session*
- *She had never had any recurrence of the symptoms*

**This case study is but
one of hundreds
(thousands?), even
though it is quite extreme**

**To varying degrees,
people's maladies show
up as corresponding
energy disruptions that
can be identified and
often adjusted**

**Whether the adjustment
is through energy
manipulation, a change
in lifestyle or a change in
the person's mental
landscape, there is often
a way to positively
impact the Living Energy
System**

- *Awareness and a willing to act upon that awareness is a powerful tool for healthier living*
- *It is also very interesting*

**I'll probably
continue to study
it for the rest of my
life.**

How about you?
